Biomedical and Pharmaceutical Engineering

Proc. of the Intl. Conf. on

ICBPE brings together global researchers and scientists from a spectrum of biomedical engineering research fields that provide novel methodologies and cutting-edge solutions to meet the emerging trends in healthcare. The Biomedical and Pharmaceutical Engineering builds on the core expertise of Biomedical Engineering which concerns with the delivery of medical treatment and therapy; development and manufacture of prostheses, medical devices and diagnostic devices; with the Pharmaceutical Engineering that emphasizes on the use of drugs, analysis of drugs, related materials and endogenous compounds and its development. The synergy of the expertise in both is cardinal for the improvement of medical healthcare.

ICBPE encompasses traditional topics like basic biological and medical sciences, medical technologies, biomedical engineering and new emerging fields like biopharmaceuticals and therapeutic engineering. This proceedings is an extensive forum where frontiers of new challenges such as drug discovery, medical informatics, biomedical engineering, computational biology, genetic repair, reproductive engineering and infectious diseases are discussed.

ISBN: 81-904262-4-9 (pbk)

Pages: 554pp

Year: Dec. 2006

Price: US\$63

ISBN: 81-904262-1-4 (CD)

Price: US\$25
